

At Lovelace Rehabilitation Hospital, we help each person overcome the effects of disease or injury. If you or your family member has had surgery, an injury, or illness, our comprehensive outpatient rehabilitation program can help you recover more quickly and allow you to return to useful and productive activities. If you have experienced a brain injury, a stroke, or a spinal cord injury, our Outpatient Center has a specific program to meet your needs. We also have services for those persons with conditions such as orthopedic, work or sports injuries. At Lovelace Rehabilitation Hospital, our services help you regain and maintain as much independence as possible. Each treatment program varies greatly depending upon your needs, but each is intensive and coordinated to help you return to your former lifestyle. We would like to talk with you about programs that will help meet your goals.

“The care I received was extraordinary. Everyone involved didn’t look at me just as a patient, they looked at me as a person.”

Paul Catasca
Former Rehabilitation Patient

Lovelace Rehabilitation Hospital is accredited by CARF in four programs: Brain Injury, Spinal Cord Injury, Comprehensive Medical Inpatient Rehabilitation, and Outpatient Rehabilitation.
